

## LITIGATING FOR EQUALITY: AN AI LEGAL CLINIC FOR EQUALITY BODIES

### Concept Note & Agenda

17-18 February, 10:00 a.m. – 12:00 p.m. CET

Register [here](#) until 11 February 2022

The development of AI-enabled technology could present a new frontier for enhancing the protection of equality in Europe, including through clarifying, strengthening and expanding existing national equality law. This is because expanding and diversify the uses of AI systems across Europe has already led and will lead to more legislative developments at both European and national levels.

The provision of legal assistance to victims of discrimination, including through test and strategic litigation, is essential to give direction to these developments through 1) identifying how the **existing legal safeguards for non-discrimination** need to be enhanced to be effective in the context of AI technologies; and through 2) clarifying how **new AI-specific legislation** can further strengthen the protection of equality. Beyond that, like [Equinet's Report "Regulating for an Equal AI: a New Role for Equality Bodies"](#) has noted, the provision of legal assistance to victims of discrimination by equality bodies will have the added value of bringing awareness about the potential for the principle of non-discrimination to be infringed by emerging forms of AI-enabled technology.

The [second Equinet Training on AI](#) aims to equip equality bodies with the necessary knowledge to provide effective and timely legal support and advice to victims of AI-enabled discrimination. Building upon the capacity already created by the [first Equinet Training on AI](#), this training will have a more specific and practical focus, providing equality bodies with concrete know-how and tools on how to identify real-life cases of suspected AI-enabled discrimination. Importantly, the training will also focus on how to handle these cases using the different legal support capacities of equality bodies, whether it is through bringing cases to court, providing legal advice or otherwise supporting victims to themselves bring cases to court.

### OBJECTIVES

**The general objective of this training is to enable equality bodies to effectively fulfil their mandate of providing independent assistance to victims of discrimination in cases of suspected AI-enabled discrimination.**

This general objective will be achieved through the following **specific aims**:

- Provide tailored support to equality bodies in identifying and assessing problematic AI practices that could give rise to equality litigation at the national level;
- Develop example litigation strategies for up to three individual cases submitted by equality bodies;
- Identify and clarify ways for fostering the involvement of relevant national stakeholders, such as civil society organisations and national regulators, in pursuing AI-related equality litigation for the identified case;

## **PARTICIPANTS**

The training will be aimed at NEB staff interested in AI, as well as NEB staff who are involved in or are interested in being involved in providing legal assistance to potential victims of AI-discrimination, including through engaging in AI-related litigation.

Just like Equinet's AI training in April 2022, there is neither a technical, nor a legal prerequisite for participation in this training.

## **METHOD**

The second Equinet Training on AI will be modelled after a **University Legal Advice Clinic**, thereby allowing members to take the lead in submitting cases and to receive concrete and practical guidance on real-life cases which they are considering to provide legal support on or to litigate.

As a first step in this process, all Equinet members will be asked to submit cases and only those chosen by the AI litigation adviser (up to three cases) will be consulted (on-line) by the adviser. The objective of these consultations will be to analyse the case and develop a litigation strategy. The results of these **case-based discussions** will be shared in two plenary discussion meetings of indicative duration 2 hours, where all registered participants for the AI Clinic will be invited to join.

In the time leading to the two interactive meetings, **all Equinet members** will be invited to engage in discussions *in the [Forum section of Equinet's dedicated AI website](#)*. These discussions will be dedicated to the topic of the AI Legal Clinic, namely **legal assistance to victims of discrimination in AI cases**.

They will take place during the **four weeks** preceding the two groups meetings of the AI Clinic, with each weekly discussion addressing a different "**question of the week**" related to one specific topic related to the provision of non-discrimination assistance in AI cases. Members of the Equinet Secretariat will moderate the discussion, providing **relevant learning materials** (some of them also available in the [Equinet AI website Library](#)) and responding to comments by discussion participants.

The case-based consultations with the Legal Clinic adviser (selected cases only) and the online Forum discussions (all Equinet members) will prepare the ground for two interactive group meetings on respectively 17 February and 18 February (see agenda below).

The two group meetings will focus solely on presenting, analysing and further advancing the litigation strategies for the selected cases which were developed during the consultations with the Clinic 's adviser. These meetings are envisioned to serve as a **practical demonstration** on how to **identify** and **build an equality legal case against suspected AI-enabled violations of non- discrimination law**.

## AGENDA

**Day I – 17 February 10:00 a.m. – 12:00 a.m.**

**Case Study I: The Netherlands Institute for Human Rights**

**Automated decision-making systems used by the Dutch Tax Authorities to calculate the amount of child care benefits**

*Moderator: **Milla Vidina**, Policy Officer with AI focus, Equinet*

<b>10.00-10.10</b>	<p><b>Introduction</b></p> <p><i><b>Milla Vidina</b>, Policy Officer with AI focus, Equinet</i></p>
<b>10.10-10.35</b>	<p><b>Setting the scene: overview of the life cycle of an equality legal case in the context of on-line recruitment discrimination</b></p> <p><i><b>Dee Masters</b>, Barrister at Cloisters Chambers with specialist expertise in the areas of employment, discrimination and artificial intelligence.</i></p> <p><i>Adviser of Equinet’s <a href="#">AI Legal Clinic</a> and co-author of <a href="#">Equinet’s Report “Regulating for an Equal AI: a New Role for Equality Bodies.”</a></i></p> <p><b>Q&amp;A</b></p>
<b>10.35 – 10.55</b>	<p><b>Case Study I: Automated decision-making systems used by the Dutch Tax Authorities to calculate the amount of child care benefits</b></p> <p><i><b>Alexander Hoogenboom</b>, General legal counsel, The Netherlands Institute for Human Rights</i></p>
<b>10.55- 11.40</b>	<p><b>Q&amp;A</b></p> <p><i>Moderator: <b>Dee Masters</b></i></p>
<b>11.40-12.00</b>	<p><b>Closing first discussion day – presentation of main conclusions through an interactive exercise</b></p> <p><i><b>Milla Vidina</b>, Equinet Secretariat, Policy Officer with focus on AI</i></p>

**Day II – 18 February Time: 10:00 a.m. – 12:00 p.m. (CET)**

**Case Study II: Equality and Human Rights Commission, United Kingdom**

**Algorithmic allocation of school places by local authorities in England and Wales**

*\* Note that the example used is fictional, but based on a composite of real cases.*

*Moderator: **Therese Keil**, Equinet Secretariat, Assistant on AI*

10.00-10.10	<b>Introduction</b>
10.10-10.20	<p><b>Recap of Day I, Case Study I: Automated decision-making systems used by the Dutch Tax Authorities to calculate the amount of child care benefits</b></p> <p><i>Dee Masters, Barrister at Cloisters Chambers with specialist expertise in the areas of employment, discrimination and artificial intelligence.</i></p> <p><i>Adviser of Equinet’s <a href="#">AI Legal Clinic</a> and co-author of <a href="#">Equinet’s Report “Regulating for an Equal AI: a New Role for Equality Bodies.”</a></i></p>
